

Junior Software Engineer Intern

Job description:

TheTopLineLab is a fast-growing data-driven consulting company in Pricing & Revenue Management, which aims to deliver advanced Pricing Transformation with a Modern approach, combining consulting methodologies, data science and software production.

We are looking for a **Junior Software Engineer Intern** to join our Engineering team at *TheTopLineLab* in Barcelona. We are looking for someone to start as soon as possible.

Tasks:

The intern will be focussing on tasks related to the development of software applications and infrastructure deployments, in a continuous integration environment. The intern will contribute to system engineering and DevOps as well as the documentation and versioning of developed software applications. They will also be required to prepare and maintain ETL data processes.

Skills and requirements:

The intern will be working with the following technologies and methodologies.

The intern must have:

- Capacity to work in an Agile environment
- Knowledge of (this is a plus):
 - Unix Bash
 - Java
 - Python
 - MVC Web development frameworks
- Strong verbal and written communication skills (in English).
- Working use of Excel and Powerpoint
- Capacity to work with a Java IDE (intellij Idea or Eclipse)

It would be a plus, if the intern had:

- Knowledge of Docker
- Knowledge of DevOps
- Knowledge of Agile Methodologies
- Knowledge of Test-Driven Development and Continuous Integration

TheTopLineLab
Pricing Power. Deployed.

Rewards package:

- Salary and timetable (flexible) to be defined
- Fun and friendly work environment with talented people
- And more!
